8.1. Review assignments 6, 7, 8, 9.

8.2. Use HashMap, FileReader and FileWriter to write a simple dictionary application. Data of words is stored in a text file named words.txt. You have to implement functions of the application with menu as the following:

```
Menu
-------------------------
    1.  Find word
    2.  Add word
    3.  Edit an entry
    4.  Display all
    5.  Exit
    Your choice: _
```

- Develop other methods in this class to conform above functions:

    i.   Find word: enables to explore meaning of a word

    ii. Add word: enables to add new word in data file

    iii. Edit an entry: enables changing meaning of a word

    iv. Display all: show a catalog of words and their meaning

- A word includes title and meaning.

    Example:

    Live

    (v) sống, ở, trú tại (adj) sống, hoạt động
